FRONTEND / FULL STACK DEVELOPER

I am a MERN stack developer who enjoys building responsive and user-friendly web applications. I mainly work with **React.js** and **Tailwind CSS**, and I like turning UI designs into real, functional products. I also have experience integrating **REST APIs** and working on full-stack features when needed.

EXPERIENCE

Software Developer

Wisdora

Dec 2025 – Present

Gwalior, MP

- Developing and maintaining a **Moodle-based learning platform** with a modern **React.js frontend**.
- Integrated **Moodle REST APIs** to handle authentication, course data, and user interactions seamlessly.
- Worked on **Moodle mobile app enhancements** and improved UI/UX for better learner engagement.
- Built scalable components and optimized performance for faster load times and smoother navigation.

Web Designer

Mono Infotech

Aug 2025 – Nov 2025

Indore, MP

- Developed responsive, mobile-first websites using **HTML5, CSS3, JavaScript, and Tailwind CSS**.
- Translated Figma designs into clean, pixel-perfect code while ensuring cross-browser compatibility.
- Improved user interface consistency and optimized frontend performance for faster load times.

Frontend Developer Intern

Alphawizz Technologies Pvt. Ltd.

Nov 2024 – Apr 2025

Indore, MP

- Built a dynamic Single Page Application for SharpFit using **React.js** and Vite.
- Integrated **REST APIs** and implemented secure **JWT-based authentication** for user sessions.
- Designed and maintained reusable UI components to ensure code scalability and readability.

PROJECTS

SmartMenuQR (Live)

MERN Stack

- Engineered a QR-based digital menu platform allowing vendors to manage menus and prices in real-time.
- Built a mobile-optimized viewing experience for customers and a secure dashboard for shop owners.

Bulk Email Utility (Live)

Node.js, Nodemailer

- Created an automation tool for sending mass emails using BCC delivery to protect user privacy.
- Implemented features for importing large recipient lists and managing multiple sender profiles.

Web Scraping Tool (GitHub)

Node.js, Playwright, MongoDB

- Developed an automated scraper to collect structured data from OEM websites using Playwright.
- Designed a scheduled system to update the database automatically, ensuring data freshness for the UI.

TECHNICAL SKILLS

JavaScript (ES6+), React.js, Next.js, Node.js, Express.js, Redux, Tailwind CSS, REST APIs, Socket.io, JWT Authentication, HTML5, CSS3, MongoDB, MySQL.

VS Code – IDE for development; **Git & GitHub** – version control and collaboration; **Postman** – API testing; **Vercel, Netlify, Render** – deployment platforms

EDUCATION

Medi-Caps University

Master of Computer Applications (MCA), CGPA: 8.1/10

Indore, MP

2023 – 2025

Jiwaji University

Bachelor of Computer Applications (BCA), 73.61%

Gwalior, MP

2020 – 2023
